Art Unit: 2175

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 35-46, drawn to methods of preconditioning a data table and searching a data table, classified in class 707, subclasses 1 and 3.
- II. Claims 47-52, drawn to a computer system including a server, classified in class 709, subclass 203.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to practice other materially different processes. A computer system can be used for word processing, performing arithmetic calculations, computer program development, sending and receiving electronic mail and receiving web page content from the world wide web.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
